- 16 - 16:30 - Break
- 16:30 - 17 - Doubts

Password Hashing

- Why we need hashing?

[how not to store passwords \(video\)](#)

[password storing methods tierlist \(video\)](#)

- What are we going to use?

[werkzeug create_password_hash and generate_password_hash \(docs\)](#)

Navbar

- why navbar?
- lets user find a familiar way to reach other links

[bootstrap navbar documentation](#)

- why conditional navbar?

dont show user something they cant access

Profile Page

- lets user see their logged in user details
- let them change their details
- nice APIs!

[dice bear api](#)

Making Homepage Frontend

- Try to come up with unique and innovative designs
- dont worry about backend and database
- practice HTML CSS for designing
